

Stimmgabel

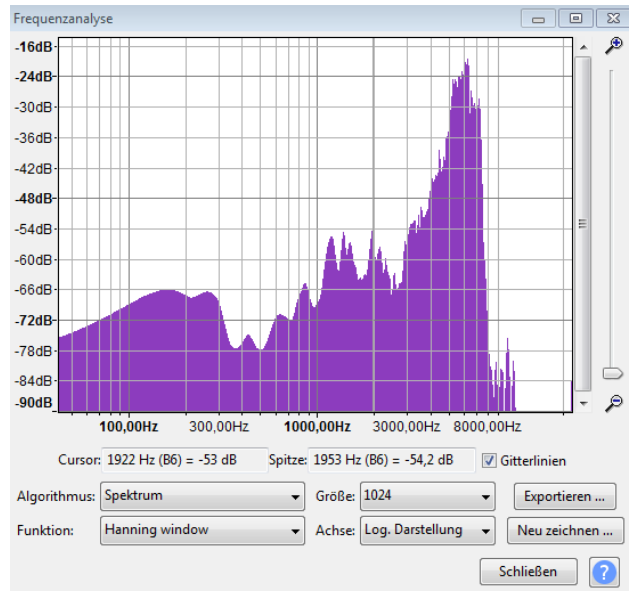

Schwebung Stimmgabeln

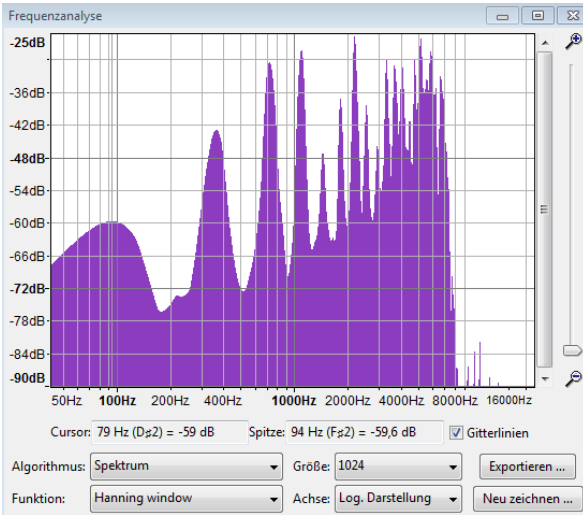

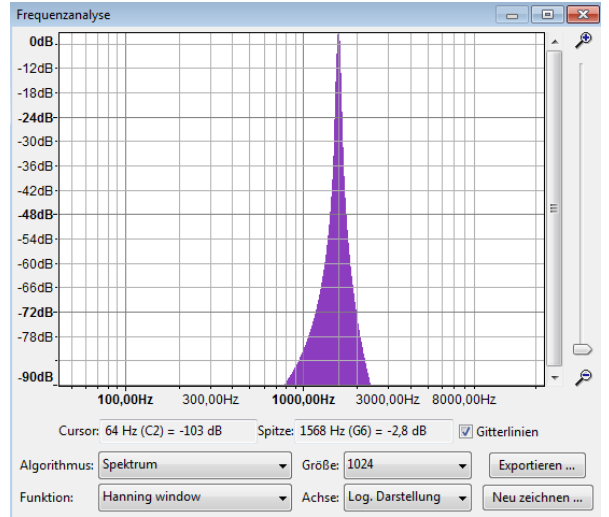

Xylophon g

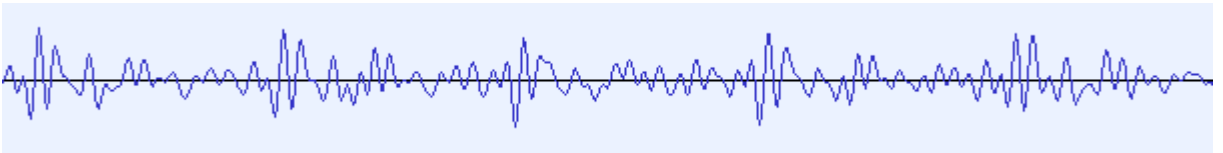

Galtonpfeife

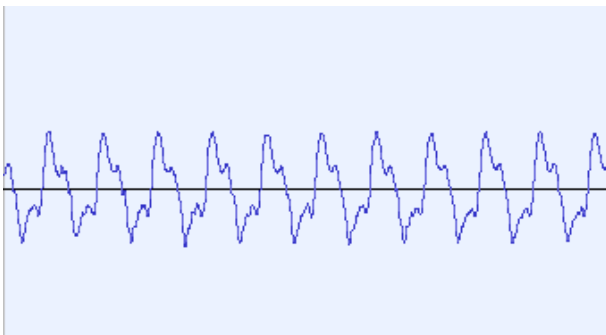

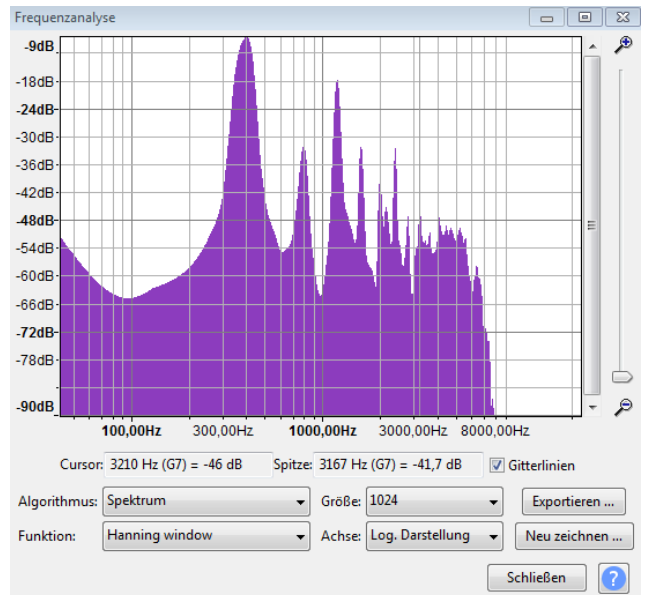

in Audacity
erzeugter Ton

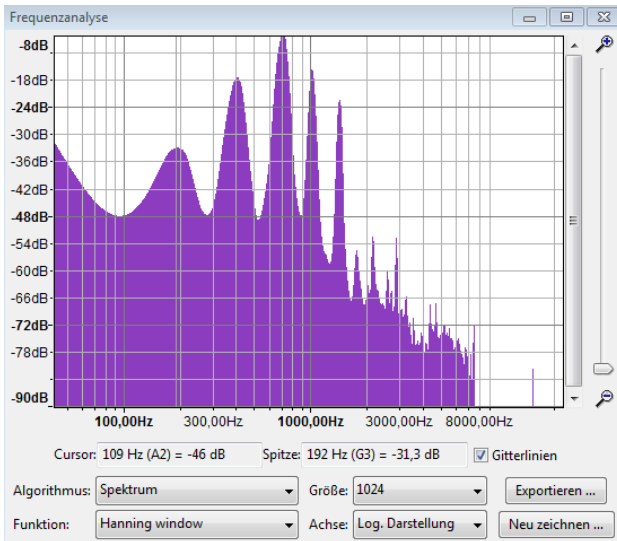

ein Ton der
Zahnradsirene

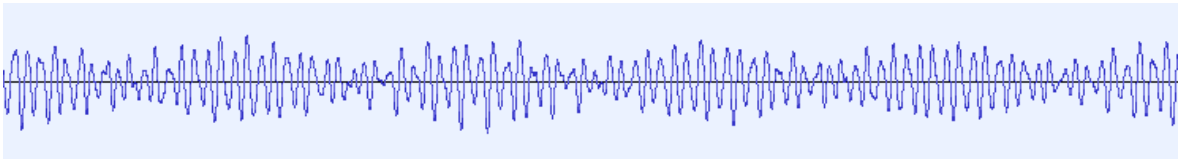

gedackte Pfeife

Schulgong
erster Ton

Das Programm Audacity ist kostenlos.
 Die Idee zu dem Versuch stammt aus dem Artikel
 „Was gibt Musikinstrumenten ihren Klang?“
 aus dem Buch von Thomas Wilhelm „Stolpersteine über-
 winden im Physikunterricht“, Aulis Verlag 2018.
 Die beiden Tonspuren für die eine Aufgabe stammen in
 meinem Fall aus dem Download-Material zu diesem Buch.
